[Luis Majano](#) has released ColdBox 2.6.0 Beta 1. There are a [number of new features](#) included in this release that are sure to make your development life even easier. It never ceases to amaze me how many great new features and improved "old" features Team ColdBox manages to fit into each release.

You can download the latest release from the [ColdBox Framework site](#) . For full documentation, check the [Trac site](#) .
