## cfUniForm FAQs

In most cases, the questions that I receive about cfUniForm are already answered by looking at the demo code in the [cfUniForm demos section](#) , but as cfUniForm has grown, there seem to be more and more questions coming in that are not explicitly answered in the demos. So, today I added an FAQ page. If you have questions about how to use the library, I recommend a 5-step process to finding the answer:

1. Look at the [demos and the demo code](#)
2. Read the [FAQs](#)
3. Read the "use example" comments at the top of each file in the library
4. Read my [blog](#)
5. Send me your question via the [contact page](#)

## Live Examples?

I have received a number of cfUniForm examples from different people that are quite cool. They could serve as excellent examples of not only cfUniForm, but of the various use cases that developers encounter in their day-to-day work and of the mad skillz and creativity used in providing a solution to the use case. Unfortunately, many of them are "behind closed doors" and/or still in development and not yet ready for public consumption. If you have public-facing examples of cfUniForm-powered forms that you would like to show off, [submit the URLs](#) and I'll add them to the list in the demos section.
