Related Categories: ColdFusion, Uni-Form Tag Library, jQuery

Dan Wilson will be presenting the [cfUniForm ColdFusion tag library](#) to the [CF Meetup](#) today (Thursday, 10/02/08) at Noon Eastern time.

[cfUniForm](#) is a ColdFusion custom tag library that generates XHTML 1.0 Strict-compliant forms for you based upon the Uni-Form markup. It also has integrated support for a number of [jQuery](#) plugins. For more information on the presentation, please [visit the CF Meetup](#) .
